Chicago, April 4, 2018—The Graham Foundation is pleased to announce the award of $534,850 in new grants to individuals around the world to support 74 projects engaging original ideas that advance our understanding of the designed environment. The funded projects include exhibitions, publications, films, new media works, and site-specific installations that promote rigorous scholarship, stimulate experimentation, and foster critical discourse in architecture.

“We are thrilled to celebrate the visionary ideas of this year’s cohort,” says Sarah Herda, director of the Graham Foundation. “We continue to advocate for innovative positions in architecture, anticipating the increasingly expansive nature of the field with ambitious and multidisciplinary projects.”

The funded projects were selected from over 600 proposals and represent a diverse group of individuals and collectives, totaling 74 projects undertaken by 111 collaborators. The projects are helmed by architects, artists, choreographers, historians, and filmmakers, who hail from around the world, representing cities such as Milan, Italy; Phnom Penh, Cambodia; Tallinn, Estonia; Kampala, Uganda; and Chicago, IL, where the Graham Foundation is based. The new grantees join a worldwide network of individuals and institutions that the Graham Foundation has supported through the award of more than 4,400 grants over the past 62 years in its role as one of the most significant funders in the field of architecture.
Included among the 74 projects supported by the Graham Foundation this year are:

- Grants spotlighting underrepresented figures, offering new histories for well-known narratives, and examining radical, yet prescient unrealized projects. For example, Nicole L. Woods writes the first monograph of American artist Alison Knowles, the only female member among Fluxus’ founding ranks, in *Performing Chance: The Art of Alison Knowles In/Out of Fluxus*. Similarly, Joseph Litchfield Conteh comprehensively documents and shares the work of African architect Demas Nwoko. In publications, Ines Weizman collects case studies from around the world, grappling with the Bauhaus as an entangled problem with multiple historiographies and Fred Scharmen examines a 1975 collaborative project led by NASA to design massive human habitats in space.

- Projects exploring forms of collectivity and spaces of convening. MILLIØNS (Zeina Koreitem and John May) catalogs speculative projects that revive the experimental spirit of modernist, collective housing in an exhibition entitled *Under Present Conditions*. In *Sacred Stoops: Typological Studies of Black Congregational Spaces*, Germane Barnes researches the porch and its historical role in the African-American community. Among others, these projects examine the precedents for and possibilities of collective living, develop performance and research around public shared space, and trace the unique architectural histories that occur within isolated environments.

- Projects that share a theme of preservation and documentation. Leveraging documentary as a form of architectural preservation, Davy Chou and Kavich Neang record the final days of Cambodia’s first and only social housing complex. David K. Ross embarks on a photographic project documenting full-scale architectural mock-ups as they are found on construction sites around the globe. In a forthcoming publication of photographs of East Germany by urban planner Ulrich Wüst, Gary Van Zante unpacks the personal view of the city before and after the Berlin Wall. Cyril Eberle, Phi Yen Nguyen, Huong Dieu Pham, and Hoanh Tran assess the urgent need to preserve the ancient Vietnamese city of Huế. Lastly, Ashley Hunt puts forth a photographic portrait of mass incarceration, documenting an entire system of control. These projects make meaning of artifact with new bodies of work in film, performance, and publication.

- Projects with a shared a goal of illuminating the visible and invisible power that architecture exerts on the built and social environment. In forthcoming exhibitions and publications, these grantees are interrogating the relationship between architecture, capitalism, and agency. Caitlin Blanchfield and Nina Valerie Kolowratnik work with tribal elders from the Tohono O’odham Nation to investigate border militarization in southern Arizona around indigenous communities. In Sun-Young Park’s *The Architecture of Disability in Modern France*, she researches the history of design for disabled individuals, while analyzing how they have negotiated and reclaimed environments intended for the able body. Responding to landscapes of violence and trauma, the projects acknowledge support systems between institutions, colonialism, and ableism.

- Significant works that rigorously contribute to a shared creative landscape. Hito Steyerl premières a new, sound-based multimedia installation at Castello di Rivoli Museo d’Arte Contemporanea that investigates the development of artificial intelligence and its relation to human knowledge. Likewise, David Reinfurt publishes his unique pedagogical approach to graphic design A *New* Primer of Visual Literacy. In an ever-shifting exhibition about identity, migration, and construction, Karthik Pandian and Andros Zins-Browne develop a new practice of architecture through labor and performance. Within these projects, the grantees are reflecting on their practices and creating speculative futures for interdisciplinarity.

A list of this year’s grants to individuals follows beginning on page 3, including recently announced 2018 Graham Foundation Fellows: Torkwase Dyson, Brendan Fernandez, Martine Syms, and Mark Wasiuta. Each of this year’s fellows will receive a monetary award in addition to a dedicated exhibition at the Graham Foundation. ABOUT THE GRAHAM FOUNDATION
Founded in 1956, the Graham Foundation for Advanced Studies in the Fine Arts fosters the development and exchange of diverse and challenging ideas about architecture and its role in the arts, culture and society. The Graham realizes this vision through making project-based grants to individuals and organizations, and by producing exhibitions, events and publications.

The Graham Foundation was created by a bequest from Ernest R. Graham (1866–1936), a prominent Chicago architect and protégé of Daniel Burnham.

THE MADLENER HOUSE
Since 1963, the Graham Foundation has been located in the Madlener House, a turn-of-the-century Prairie-style mansion designed by Richard E. Schmidt and Hugh M. G. Garden. Built in 1901–02, it was later renovated by prominent modern architect Daniel Brenner. The 9,000-square-foot historic home now hosts galleries, a bookstore, an outdoor collection of architectural fragments, an extensive non-lending library of grantee publications, and a ballroom, where the Foundation hosts a robust schedule of public programs.

BOOKSHOP
The Graham Foundation’s bookshop, designed by Ania Jaworska, offers a selection of new, historically significant, and hard-to-find publications on architecture, art, and design, many of which have been supported by grants from the Graham Foundation.

GALLERY HOURS AND VISITOR INFORMATION
The galleries and bookshop are open to the public Wednesday through Saturday, 11 a.m.–6 p.m. Admission is free. Group tours are available by request.

ACCESSIBILITY
The second-floor galleries and the third-floor ballroom, where events are held, are only accessible by stairs. The first-floor galleries and bookshop are accessible via outdoor lift. Please call ahead to make arrangements.
