Graham Foundation Announces 2019 Grants to Individuals
Over $460,000 awarded to individuals supporting new and challenging ideas in architecture

Chicago, April 30, 2019—The Graham Foundation is pleased to announce the award of 63 new grants to individuals worldwide that support projects on architecture. Grantee projects represent diverse lines of inquiry engaging original ideas that advance our understanding of the designed environment. Selected from over 500 proposals, the funded projects include exhibitions, publications, films, and performances that promote rigorous scholarship, stimulate experimentation, and foster critical discourse in architecture. The individuals leading these projects are based in cities such as Ahmedabad, Berlin, Buenos Aires, Cairo, London, Milan, Los Angeles, New York, and Chicago, where the Graham Foundation is based. The innovative projects are led by eminent and emerging architects, artists, curators, filmmakers, historians, and photographers, among other professionals.

“The designed environment continues to be the center of timely, critical debates within art, culture, and society,” remarks Graham Foundation director Sarah Herda. “This year in particular, many of the funded projects are rooted in different forms of political engagement.”

The new grantees join a worldwide network of individuals and organizations that the Graham Foundation has supported over the past 63 years. In that time, the Foundation has awarded more than 4,500 grants, and has become one of the most significant funders in the field of architecture.

The complete list of the 2019 individual grantees follows. Please find descriptions of the awarded projects beginning on page 3. To learn more about the new grants, click on any grantee name below to visit their online project page, or go to grahamfoundation.org/grantees.
